CRESTRON

Speaker:
Dave Silverstein – Regional Manager

Subject: Systems Builder *Presented in English Only*

System builder provides a complete graphical Windows environment from start-to-finish for control systems programmers, incorporating design tools with drag and drop menus for speed and accuracy. System builder allows you to complete more jobs in less time by automatically programming the system and laying out the GUI design. This simple to use software will be explained in this session where you will learn the following:

- Adding Hardware to your system in the Equipment view
- Adding interfaces and engraving
- Basic programming functions inside system builder framework
- How to use the de-bugging tools inside real time view
- Review documentation created by System Builder

NEC

Speaker:
Dave Arnott – Business Development Director

Subject: LCD vs Plasma *Presented in English Only*

NEC's LCD displays take your digital signage applications to a new level of performance. With the Digital Signage Technology Suite (DSTS), nearly 30 advanced features to meet your needs now and in the future, these displays attract an audience while making your job easier. See the difference between commercial LCD vs. a residential LCD.

Speaker:
Marc Lacroix – Audio Visual Market Developer

Subject: Optical Fibre *Presented in French Only*

Myths and truths of fibre optics
Advantages of fiber optic systems
Transmitters and receivers fibre optics
Fibre optic connectors

Profile : Marc Lacroix works in the audiovisual industry for over 26 years. His training in electronics enabled him to hold various posts including that of technician, project manager, responsible for the senior and currently as manager of audio visual market in SF Marketing in Montreal. With more than 300 projects carried out during his career he gained extensive experience in system integration.

Speaker :
Karl Rosenberg, Application Specialist Extron

Subject: Scaler *Presented in English Only*

This class will look into his world of Scalers, Picture in Picture Processors and Window Wall Technology. The idea of seeing more sources on one screen has been a round for a while. The last couple of years the idea of showing multiple RGB, HDTV and Video Sources on one screen has really become popular. With new Signal Processors, you can now show Multiple Computer and Video sources on one screen or spread one image across multiple Screens. Clients such as the Military, Medical, Government and Education are just some of the many users of today's Multi-Image World.

Profile : Karl Rosenberg is a specialist in applications for Extron Atlantic Centre. Mr Rosenberg lives in the Washington DC area where he worked in the audiovisual industry for 20 years. He started in the industry at Future View Inc. where he made use of facilities and service broadcasting. He later worked for Digital Projection as a trainer and engineer. Karl is currently responsible for the training of all dealers Extron on its territory. Added to this, presentations given to exhibitions such as CEDIA, BICSI, NSCA and INFOCOMM. It is also a trainer ICIA in Fairfax, Virginia where he holds the title of associate professor.
